

SKULL KING®

THE RASCAL'S SCORING

This scoring method is ideal for cunning and calculated players who seek a more even-keeled adventure.

Each round, every player has the same potential score, regardless of their bid. The potential score equals 10 points for each card dealt that round.

Example: If 5 cards are dealt, the potential score is 50 points, whether you bid 0, 3, 1, or 5.

How many of those points you earn depends on how close your bid is to the number of tricks you take.

Direct Hit: You take the exact number of tricks you bid.

- Earn *all* of the potential round points

Glancing Blow: When you are off by 1 on your bid.

- Earn *half* of the potential round points.

Complete Miss: When you are off by 2 or more.

- Earn *none* of the potential round points.

Bonus Points

Bonus points follow the same rules.

- **Direct Hit:** Earn all potential bonus points
- **Glancing Blow:** Earn half of the potential bonus points
- **Complete Miss:** Earn no bonus points

Example A: Harry, Shirley, and Poe bid 0, 1, and 2 in a round where 3 cards are dealt. All three make their exact bid, land a direct hit, and score 30 points each.

Example B: In the next round, 4 cards are dealt, making the potential score 40 points. Harry, Shirley, and Poe bid 1, 0, and 4. Harry gets his bid, Shirley is off by one, and Poe is off by 2.

Their scores would be:

- *Harry: Direct Hit = +40 points*
- *Shirley: Glancing Blow = +20 points*
- *Poe: Complete Miss = +0 points*
